FLIP HISTORY!

Focus on the question

What question do you have? What problem do you have to solve? What is your focus for this assignment?

- a) I have to locate information from different periods of Canada's history.
- b) I have to make a timeline poster of the information I find.
- c) I have to select and write about 5 events and how they affected the country.

INPUT AND PROCESS INFORMATION

Now that you've got the information, how will you select the best or most appropriate information?

- a) I'll pick ones I've heard of ask for help from my parents in selecting the most important ones. I'll list them on the computer using the list feature.
- b) I'll illustrate the same items and people that I'll be writing about.
- c) I'll make point form notes on the articles I find and write an article using my notes.

INTELLIGENT THINKING

Now that you've completed your project, what can you do differently next time to make the process more efficient, or make a better product?

Some of my articles were hard to read because of the font, so I'll use a regular font for the article, but I think I can still use a fancy one for the title.

I rushed the articles at the end because I spent too much time on the illustrations. They were worth more marks so I should work more on those things first.

- a) I can check encyclopedias and books in our library. I'll do a search on the internet.
- b) For the poster, I'll use fanfold computer paper and markers. I'll need some pictures to help with my illustrations.
- c) I'll look up sepcific events in the Canadian Encyclopedia.

- a) I'll add a word art title to make my page look more interesting.
- b) I'll write the information on the poster in the same style of writing that was used at the time.
- c) I'll also print out the articles in a font that is like the style of the time.

LINK UP WITH INFORMATION

Now that you know the question, where can you find the information you need?

PRODUCE A DEMONSTRATION OF YOUR LEARNING

Now that you've sorted your information, how can you demonstrate your learning?
